

Which cereal has the best rating?

which manufacture has the highest rating ?

N manufacturer with the highest average rating, with the toppest product Shredded wheat spoon size. The rest of the manufacturers do not have significant differences in their average ratings at a 95% confidence level.

Does a sugar increase the rating?

There is a significant negative linear relationship between the amount of sugars in the cereal and its rating, which is the reverse of what I had expected. For every 1g increase in sugar, we can expect a deduction of 2 points from the rating.
